

## COMBI FOLDING SIGN

In order to simplify marking on road vehicles that shall guide traffic to right or left, we have developed a Combi Folding Sign that is capable of showing both road work sign and blue-white arrow. The sign can then be attached on the road vehicle and the correct marking can be achieved in a time saving way.

The blue-white arrow is available both for right and left type. The hinges are reflective so that very little of the sign is obscured. The position of the sign is fixed by powerful permanent magnets.
