

FLIP SIGN AS2-AL1800

AS2-AL1800 is developed from AS2-AL for adaption to new rules for marking of vehicles used for road work. The driver/user can adapt the movable outer wing so that the edge of the flip sign is within 10 cm from the outer part of the vehicle.

The sign is pneumatic and is operated from the driver cabin. The height of the reflective area is 300 mm and the height of the sign is 324 mm.
